

**Are you doing all the
maintenance you need?**

Find out with

eMCP by **CEDES** 

A patented electronic version of a
Maintenance Control Program

The process...

SURVEY THE FLEET

A survey of each unit is used to obtain the specific characteristics of each piece of equipment in its application

GENERATE THE MCP

We generate an MCP specific to every unit based on the survey results, identifying all applicable components requiring maintenance

COMPLETE THE INPUT

We then provide the required maintenance procedures at appropriate intervals to be recorded when the work is completed

VIEW THE RECORDS

All recorded work can be viewed securely in real time and Code-required records generated on demand for your inspectors

...and the results

- ▷ Find out if you are paying for elevator maintenance that isn't being performed
- ▷ Reduce maintenance costs while increasing reliability
- ▷ Meet Code requirements with instantly accessible maintenance work records

**Proven to reduce the
number of callbacks
by as much as 80%**

COST CONTROL

eMCP is a tool to develop accurate bids by using the program's calculated maintenance hours

IMPROVED OPERATION

Equipment, properly maintained, will be at its optimal performance, reducing downtime and costly repairs

CAPITAL PRESERVATION

eMCP provides the key to extended elevator service life through regular and accountable maintenance practices

**Get Code-compliant and
instantly accessible records
of maintenance work**
