SKYLER
ELEVATE

Beyond predictive maintenance

SKYLER Elevate, powered by relayr, is an award-winning elevator solution that analyzes the root causes of elevator faults around the clock. SKYLER Elevate is a multifaceted companion. It harnesses the power of data through retrofittable sensor-based hardware and a white-labeled portal. It is the brand-agnostic solution that puts you in a position to win.

www.relayr.io

Enabling new revenue streams

Reduce the number of planned visits through remote diagnostics

Reduce the number of callbacks & shorten the troubleshooting time through root-cause analysis

Make unplanned service visits plannable – react to wear & tear in advance

Improving operational efficiency

**Provide your customers with a white-labeled portal showing all connected asssets**

Advise your customers on possible modernizations and optimizations

Help your customers with compliance and reporting on their assets

How it works

SKYLER Elevate offers elevator maintenance and service providers a powerful toolkit for improving operational efficiency. Inspired by your needs, it works across models and systems through retrofittable sensor-based hardware. SKYLER Elevate comes with fully integrated software tools fitted to the maintenance and service process – the onsite assistance and dispatcher support ensure your peace of mind. Not only that, your customers can access relevant data in a white-labeled portal tailored to their needs.

Key features

24 / 7 Remote Condition Monitoring

Non-intrusive Installation in <30 mins

Condition-based Maintenance

Data Transparency Across Portfolio

Door Anomaly Detection & Alerting
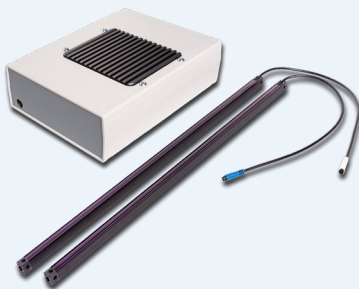

White-label Customer Portal
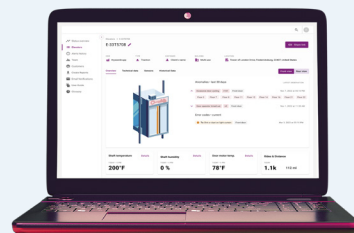

Turn-key Sync With PowerBI (Optional)

Maintenance Detection
