

When the water level and temperatures are rising ...

When extreme weather strikes or an old pipe bursts, risks to people and equipment rise fast. **Elevate Wireless** gives you an immediate warning, helping you **stay in control** and **prevent the worst-case scenario**.

Reliable detection of water in the pit
and high temperature in the machine room

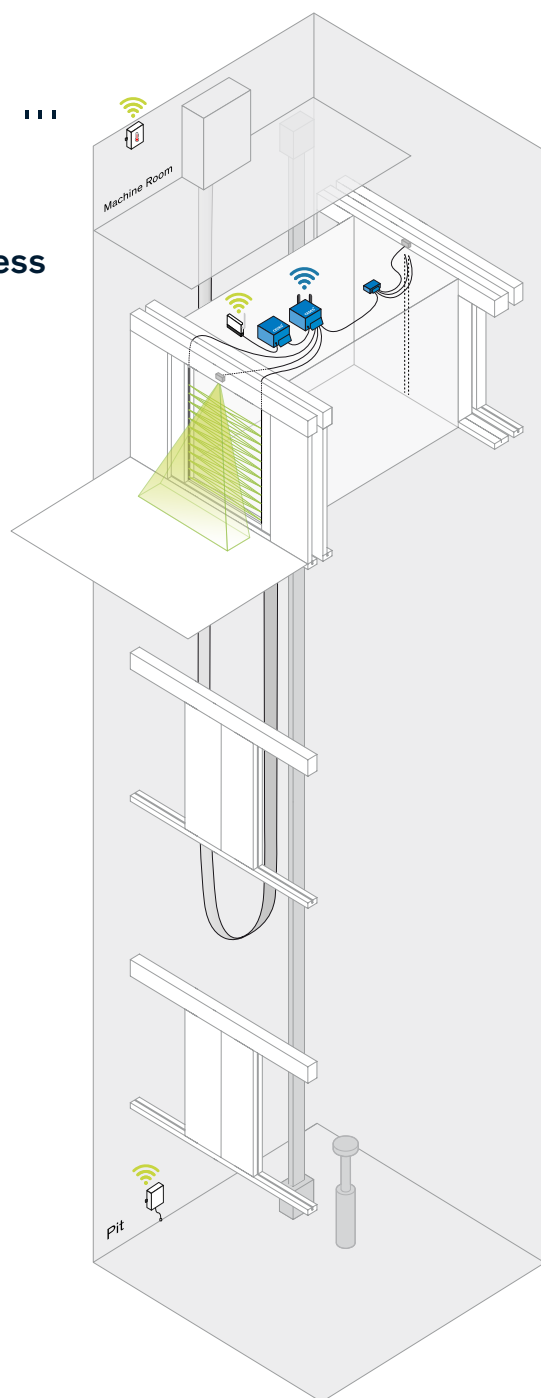

Instant alerts in the CEDES Elevate Dashboard
and via email

Integrated into a comprehensive, secure,
cloud-based remote monitoring solution

Easy installation and setup with wireless sensors
and a gateway

... keep your technicians, passengers,
and equipment safe at all times.
